

## High-Performance Sweep/Vacuum 13 Yard Unit

2007

### Industry's Greatest Maximum Sweeping Power Cleans Runways, Re-Surfacing Millings and Even Catch Basins

High performance vacuum forces along with strength and versatility combine to set Vacall All Sweep models apart from all competitors' parking lot, runway, catch basin and leaf cleanup machines.

Independent lab tests show the All Sweep fan can deliver a maximum air flow of 31,000 CFM – the best in the industry.

## FEATURES & BENEFITS

### All Smart Flow™ intelligent control system:

A Vacall exclusive, this innovative CAN bus control system encourages greater operating efficiency with easier precise water and vacuum adjustments. A fully proportional wired pendant, makes control possible away from the chassis.

**Catch basin:** The catch basin and leaf pickup intake tube and boom stow out of the way hydraulically against the rear of the tailgate. High-power vacuum tubes, (12") use the industry's greatest vacuum forces to pick up leaves, rocks and debris from catch basins and curb strips.

**Wider sweeping area reduces cleanup time:** This unit has a single sweep mechanism; All Sweep models have a full-width sweep system. Full-width nozzles, gutter brooms and a centrifugal fan quickly pick up litter, stones, asphalt millings and debris – a big advantage when there's a need to clear runways and roads fast. From the cab, operators can raise, lower and tilt the nozzles .

**Cab & Chassis** 1997 Ford LN8000 Cummins Diesel ISC Engine L6, 8.3 (504 CID) w/ Allison Automatic RDS3000  
Transmission GVWR of 32000. LV13-SC-1540 - Combination Unit.
